| 17 | TANKS | | | | | | | | | | | | |
| 17.1 | Condensate Storage tank (150m3) | | | | | | | | | | | | |
| a | External Uninsulated upto 120 Deg. C | PE&SD | | Outdoor | | SA 21/2 | -Inorganic Zinc Silicate Primer -Dry film thickness: 65-90 microns -Required surface profile: 50 microns -Maximum temperature resistances: 400°C -Minimum Volume Solids: 58 ASTM D2697 1. The product shall conform to SSPC Paint 20 Type 1-C with a zinc dust level of greater than 70% by weight in the dry film. The zinc dust shall have a "metallic" zinc content that meets the requirements of ASTM D-520 Type 1. Random sample for zinc dust content to be checked at site/lab. | High Build MIO Epoxy -Intermediate Dry film thickness: 100-150 microns -Required surface preparation: Clean, dry epoxy primer (type 04) -Maximum temperature resistance: 120oC -Minimum Volume Solids: 55ASTM D2697 The quantity of MIO in the main pigment shall be 80% by weight. | Aliphatic Urethane Finish -Dry film thickness: 40-75 microns -Required surface preparation: Clean, dry epoxy intermediate(type 05) -Maximum temperature resistance: 120oC -Minimum Volume Solids: 60 ASTM D2697 | 215-350 | White(BS: Code 00-E-55) | Where prep. Is carried out in a shop or offsite it is mandatory that the painting to be carried out at the same location. | |

| | | | | | | | | | | | |
|------|--|-------|----------------------------------|-------------------|-----------|---|--|---|---------|-------------------------|---|
| b | Internal(Condensate Tanks) | PE&SD | | Outdoor | SA 2 1/2 | HB Epoxy Phenolic -Required surface profile: 50-80 microns -Minimum Volume solids : 65% ASTM D2697 -Dry film thickness : 100-150 microns/coat -Maximum temperature resistance :150°C | HB Epoxy Phenolic -Required surface profile: 50-80 microns -Minimum Volume solids : 65% ASTM D2697 -Dry film thickness : 100-150 microns/coat -Maximum temperature resistance :150°C | HB Epoxy Phenolic -Required surface profile: 50-80 microns -Minimum Volume solids : 65% ASTM D2697 -Dry film thickness : 100-150 microns/coat -Maximum temperature resistance :150°C | 300-375 | | |
| c | Tank Bottom plate (inside) | PE&SD | | Outdoor | SA 2 1/2 | Amine Adduct Cured Epoxy -Dry film thickness: 100-150 microns -Required surface profile: 50 microns | Amine Adduct Cured Epoxy -Dry film thickness: 100-150 microns -Required surface profile: 50 microns | Amine Adduct Cured Epoxy -Dry film thickness: 100-150 microns -Required surface profile: 50 microns | 200-300 | | Shop built tanks will be shop painted. |
| d | External of underside of all tank | PE&SD | | Outdoor | SA 2 1/2 | Coal Tar Epoxy -Dry film thickness: 150-200 microns -Required surface profile: 75 microns | NA | NA | 150-200 | | A strip 75 mm wide at plate edge shall be left bare to avoid welding contamination |
| 17.2 | Expansion Tank for DMCW Circuit | | | | | | | | | | |
| a | External Uninsulated upto 120 Deg.
