SPECIAL CONDITIONS OF CONTRACT FOR MAINTENANCE OF B.G AND GANTRY TRACKS  
IN FACTORY

The Engineer in charge will allocate works from time to time for each independent work to be carried out by the contractor. The contractor will have to complete each of the works within the stipulated period. Items of work other than mentioned in the Bill of quantities have to be carried out at the rate to be fixed by the organization.

Power, water and compressed air will be available at free of cost from the nearest tapping point. The contractor should make necessary arrangement for tapping the same.

All safety precautions should be taken up while doing the work. On return request safety belt, helmet, etc. will be issued on returnable basis.

**PART A – BROAD GAUGE TRACK**

**SCOPE:**

The scope covers the general requirement for preventive and corrective maintenance of B.G.tracks inside and outside BHEL complex upto railway limit around 4300m length of track from MCN West connection (“X” Point to inside siding).

**NATURE OF WORKS:**

BG Track siding is provided around 4300 metres length formed with 90 Lbs / 105 Lbs rails.

The main area where maintenance is required are indicated below:

- Track – alignment leveling, gauge of tracks, tightening of bolts, fish plates, steel keys, tie bars with cotters, spikes, sleepers, etc., as and when required.
- Transporting the sleepers from stores (wooden/CST-9 concrete) and replacing the damaged one as and when required.
- Packing of murrum ballast, whenever necessary to remove and relaying.
- The murrum ballast should be submitted with stone ballast using 40mm/20mm size wherever necessary adjoining, side drains, culverts, bridges, cleaning before and after rains to ensure no stagnation of water, both side of track.
- Maintaining of earthen embankment standard width before and after rains to ensure that the eroded portion if any is made good.
- Thorny bushes and vegetation are to be cleared then and there to avoid water stagnation and for inspection of track fittings.

CONTRACTOR / TENDERER

ACCEPTING OFFICER

- The rails, fish plates, bolts, nuts and other fasteners supplied by BHEL at free of cost has to be replaced in the worn out parts, as and when required.
- The Wooden / CST-9/RCC sleepers etc., has to be replaced as when required.

## **PART B – GANTRY TRACKS IN SHIPPING YARD AND RMS YARDS**

### **SCOPE OF WORK:**

The Shipping and RMS yards are provided with 990m parallel length of gantry tracks formed with CR-80 and 105lbs rails. Overall gantry track 990m should be maintained once in 15 days. The main areas where maintenance is required are indicated below.

### **NATURE OF WORK:**

- Track alignment, leveling, tightening of bolts, clips, fish plates and spikes. Replacing rails, fish plates, spikes, sleepers, etc., as and when required.
- Substituting of RCC sleepers in wooden sleepers area when ever necessary.
- Transporting the sleepers and replacing the damaged as and when required.
- Packing of ballast, wherever necessary to removing and relaying.
- Side drains clearing before and after rains to ensure no stagnation of water in the Yard.
- Thorny bushes and vegetation are to be cleared then and there to avoid water stagnation and for inspection of track fittings.

### **WAGES:**

- The contractor should give a paid weekly holiday to his workers.

### **MATERIALS SUPPLY:**

Rails, CST 9/wooden/RCC sleepers with fasteners will be supplied by BHEL free of cost at BHEL stores. If the materials supplied by BHEL is lost by the contractor the recovery will be made at the book value together with 30% departmental charges.

### **GENERAL:**

The objective of track maintenance (Gantry and BG track) is to keep the tracks fit for the movement of cranes, loco with wagon through out day and night without any interruption.

- To achieve this, the Contractor, should be ready to do the work even on holidays and during night to handle emergency cases.

CONTRACTOR / TENDERER

ACCEPTING OFFICER

(.....3)

- All the tools and plants required for the maintenance will be supplied to the contractor on written request on free of hire charges. The contractor should possess the tools and plants at all times. At the close of contract the tools and plants should be returned to Engineer-in-charge, failing which recovery will be effected based on the book value of the tools and plants with 30% as departmental charges.
- If the performance of the contractor is not satisfactory BHEL can terminate the contract with an advance notice of one month.
- All safety precautions should be strictly followed during maintenance. If power supply is to be cut off to carry out the maintenance work, it should be brought to the notice of the Engineer in charge immediately. Without obtaining the written clearance from Engineer in charge, the work should not be taken up.
- All foreign materials like oil, grease, rust, iron chips, etc. should be removed and the tracks should be kept clean (for gantry & BG track).
- The tracks are subjected to vibration due to movement of cranes, loco with wagon fish plate connections, spikes and ballast materials, etc., may get loosened, consequently the gauge alignment and level of the track gauge alignment and level at all times.
- The contractor should maintain a log book for having tightened the fish plate connections and spikes regularly signed both by the contractor and the supervisor in charge. For both BG and gantry track log book should be submitted to the Engineer in charge for verification.
- Wooden blocks kept at the buffer should be in good condition and if defect is noticed it should be replaced. Wooden block will be supplied by BHEL at free of cost.
- All worn out broken rails, CST 9 sleepers, Wooden/RCC sleepers should be removed and should be replaced with new materials. All materials removed for replacement should be returned to the departmental stores.
- The standard ballast thickness should be maintained at all times. Wherever the ballast materials are loose, it should be removed and the salvaged material free from foreign materials should be relaid and packed. If more ballast materials are required it should be supplemented with new ballast materials.

(.....4)

CONTRACTOR / TENDERER

ACCEPTING OFFICER

- Water stagnation should be prevented at all times. To achieve this, cleaning of storm water drains and leveling the areas immediately after each rain should be done in addition to periodical cleaning of once in two months.
- At all road and rail crossings, the gap should be kept clean. The expansion gap between the two rails should be maintained at all times and the gap should be kept free from all foreign materials. (BG and gantry track area).
- To carryout works as listed in bill of quantities, adequate manpower should be engaged as and when required as per the instructions of supervisor/Engineer in charge.

CONTRACTOR / TENDERER

ACCEPTING OFFICER
