SubContracts DEPT
BHEL PSSR CHENNAI
Corrigendum-1,dt:5/7/2016

BHEL's clarifications are furnished below against some of the bidder's query sought vide letters/email in Tender Specification BHEL PSSR SCT 1628 for Execution of STG work at 1 X 800 MW Kothagudem TPS, Telangana State .

Slno	DOCUMENT	CLAUSE NO	EXISTING PROVISION	BIDDER QUERY	BHEL Clarification
1	TCC	1.14.1.23	The tube shall be inserted such that it shall project 2 to 3 mm beyond the tube plate outer surface. The tube shall be expanded using an automatic electronic torque control tube expanding unit or pneumatic tube expander so as to get the % thinning of the tube walls and elongation of tube ends as recommended by the supplier / Drawing / Tube expansion procedure. The length of expansion in no case shall exceed a length of 70 to 80% of the tube plate thickness. Finally, proper trimming of the excess length of the tube shall be carried out and flare-up / bell mouthing has to be done by the contractor at his cost.	Please confirm the scope of supply for the Automatic electronic torque control/pneumatic tube expander machine	Supply of T&P as per Vol 1A, Part I, Chapter IV
2	TCC	1.14.1.23	The tube shall be inserted such that it shall project 2 to 3 mm beyond the tube plate outer surface. The tube shall be expanded using an automatic electronic torque control tube expanding unit or pneumatic tube expander so as to get the % thinning of the tube walls and elongation of tube ends as recommended by the supplier / Drawing / Tube expansion procedure. The length of expansion in no case shall exceed a length of 70 to 80% of the tube plate thickness. Finally, proper trimming of the excess length of the tube shall be carried out and flare-up / bell mouthing has to be done by the contractor at his cost.	Please confirm any stitch welding is applicable between tube and tube walls.	Stich welding is not applicable
3	TCC	1.9.1	Weight Schedule Summary D. Pumps and Motors (BFP,CEP, CW Etc.,)	The summation of weight given is 10,07,610 Kgs. But the actual summation is 54,04,110 Kgs. Please Confirm	Item D.28 to be read as other misc. Hardware is 4,88,500 Kg.However the summation given in tender is in order.
4	TCC	16.16	PRIMER AND PAINTS FOR FINAL PAINTING	Please provide BHEL/Customer approved agency list for the supply of Paints	Customer Approved Agency will be provided after award of contract.
5	TCC	1.12.17	Grouting of equipments is included in the scope of contractor. All the materials required for grouting including special cements like PAGEL, CONBEXTRA- GP2, SHRINKOMB or its equivalent grade free flow cement as approved by BHEL and other materials like Portland cement, sand, gravel etc., are to be arranged by the contractor within the quoted rate. It shall be the responsibility of the contractor to obtain prior approval of BHEL, regarding suppliers, type of grouting cements before procurement of grouting cements.	Kindly specify the volume of grouting	Vendor to refer Clause 1.12.19
6	TCC	Chapter II, clause no: 1.2.9	"Obtaining clearances and approvals from all applicable statutory / Government agencies e.g. IBR, Electrical Inspectorate etc. is also in the scope of contractor	As TG integral piping erection work only included in this package, should we take any permission from IBR inspectorate for execution of TG package? Kindly confirm.	Statutory clearances , if any applicable as mentioned in the tender is in the scope of the vendor.
7	TCC	chapter V, clause no 1.5.3.2	portable gantry: crane erection, load test , commissioning and dismantling etc are in the scope of contractor	Please confirm the portal gantry crane tonnage details for erection. We presume M/s BHEL will provide the load at site for load test. What will be the maximum weight of load sections to be handled at site. And also please clarify the scope of supply of paint for touch up painting	Portal gantry crane is 512 MT. Vendor to refer Clause 1.5.3.2.

SubContracts DEPT
BHEL PSSR CHENNAI
Corrigendum-1,dt:5/7/2016

BHEL's clarifications are furnished below against some of the bidder's query sought vide letters/email in Tender Specification BHEL PSSR SCT 1628 for Execution of STG work at 1 X 800 MW Kothagudem TPS, Telangana State .

Slno	DOCUMENT	CLAUSE NO	EXISTING PROVISION	BIDDER QUERY	BHEL Clarification
8	TCC	chapter IX, Clause No 1.9.1	BOQ, Sr. No E BOI items, there is no weight details given for following items.	Provide tonnage details of following items of BOI, a. Hydraulic Unit Assembly (Sr. No 46 of BOI) b. Generator Integral piping (Sr. No 47 of BOI) including valves &fittings c. Hydrogen coolers piping (Sr No 48 of BOI) d. Turbine oil (No of Drums / barrels) (Sr no.63) e. Turbine Integral Piping (Sr. No 66 of BOI) including valve f. H&S for turbine and generator integral piping (Sr. No. 67 of BOI) g. LP by pass stop &control valves (Sr. No 71 of BOI) h. Misc. Cranes, Electric hoists, chain pulley blocks (sr. No 85 of BOI) Details of cranes, hoists & chain pulley blocks and specific equipment / area to be confirmed.	Tentative Quantities as as below: 1. Hydraulic unit assembly---4.416 MT 2. Generator integral piping---14.852 MT (Gas system, seal oil, LDR, Primary Water, Waste gas system, Waste Fluid system) 3. Hydrogen cooler piping---7.036 MT 4. Turbine oil (No. of drums)---261 Drums 5. Turbine integral piping---45.922 MT (Lube oil, 6. H&S for turbine and generator integral piping---18.249 MT 7. LP bypass stop and control valves---24.37 MT (Valves, Actuator & Hydraulic unit) & 0.5 MT (Control oil piping) 8. The tentative list is as below,list is not exhaustive. **MIsc Cranes** 1.8T Single Girder EOT crane in Air compressor Building – 1 No 2.5T Single girder EOT cranes in Fire water Pump house- 1 No 3.8T single girder EOT crane in DG room – 1 No 4.8 T single girder EOT crane in CWPH – 1 No 5.5T single girder EOT crane in ACW pump house- 2 Nos **Misc Hoists: erection upto junction box in scope of vendor** 1. AC plant room hoist 5T – 1 No 2. Vaccum pump handling – 5T – 2 No 3. DMCW pump handling – 5T – 2 no 4. Drip pump 5T- 2 No 5. DM Transfer Pump – 2T- 2No 6. Vaccum pump handling 3 T- 2 Nos 7. Lube oil unloading 3T- 1 No 8. Condensate transfer pump 3T- 1 No 9. 8.4 Metre level at ESP building 3T- 2 Nos 10. 16.7 metre level at ESP building 3T – 2 Nos 11. Elevator M/c room (TG building) 3T – 2 Nos 12. Elevator M/s Room (ESP building) 3T – 2 Nos 13. Boiler MCC room -10T – 2nos 14. Cw Bay handling 15 T – 2 Nos
9	TCC	Chapter No XIV, clause no 1.14.1.10	Generator stator may be unloaded away from the A row columns and in such case dragging of stator and bringing it to the unloading point is in the scope of contract	M/s BHEL to confirm whether Generator stator is brought under the portal gantry crane reach (or) unloaded away from the A row column. What would be the max. distance if it is unloaded away from the "A" row columns since dragging of generator to the reach of portal gantry crane from the unloaded point has additional cost implication	Generator Stator will be brought at lifting position of the portal gantry crane.
10	TCC	chapter no: XIV, clause no 1.14.1.32	sand Grit /shot blasting of condenser is in the scope of contractor	M/s BHEL to confirm the tentative surface area of condenser,Water box and tube sheet in square meter for the estimation purpose	condenser drawings is enclosed for information and the same may be revised during execution.

SubContracts DEPT
BHEL PSSR CHENNAI
Corrigendum-1,dt:5/7/2016

BHEL's clarifications are furnished below against some of the bidder's query sought vide letters/email in Tender Specification BHEL PSSR SCT 1628 for Execution of STG work at 1 X 800 MW Kothagudem TPS, Telangana State .

Slno	DOCUMENT	CLAUSE NO	EXISTING PROVISION	BIDDER QUERY	BHEL Clarification
11	TCC	Nil	General	BHEL to provide the list of major T&P such as Crane, trailer,hydra etc. to be deployed by contractor other than the T&P provided by M/s BHEL for Material handling purpose i.e., loading at store,transportation and unloading at site etc for loading the cost	Supply of T&P as per Vol 1A, Part I, Chapter IV
12	TCC	Nil	General	Regarding Excess Piping Quantity - If there is any increase in the tendered TG integral piping quantity (above +15%), the quantity exceeding +15% of tendered quantity shall be paid @ unit rate / MT arrived on the basis of Total BBU % provided for integral piping (i.e,13.6% of LS price) divided by tendered quantity of TG integral piping because the piping erection cost shall not be the same of equipment erection cost.	Tender conditions prevail
13	Nil	General	Time Extension-We are studying the scope of work and have sent some queries which have to be clarified by M/s BHEL and our site visit is still pending due to pre-occupations.	Request you to kindly extend the due date of submission of above tender up to 15-07-2016	Time extension for bid submission is not possible due to administrative reasons,hence bidders are requested to submit their offers as per the schedule indicated in the tender

All other conditions remain unchanged

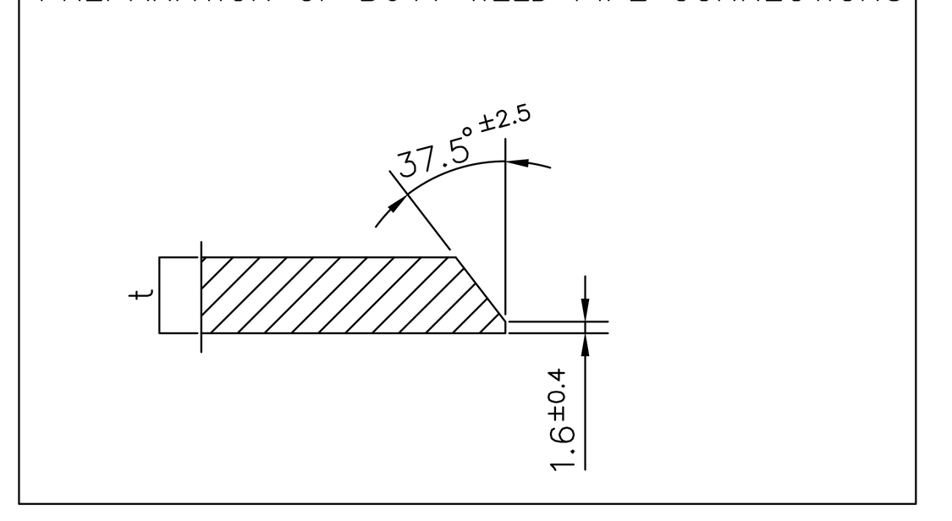
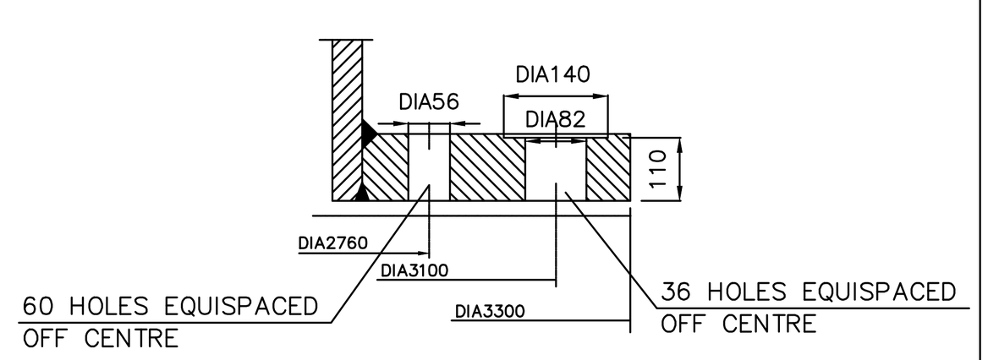
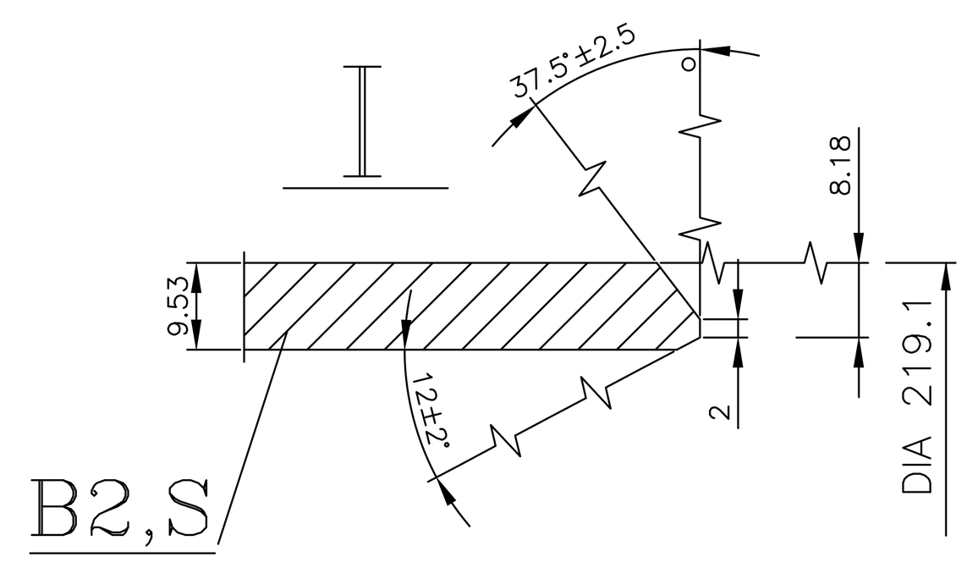
UNLESS OTHERWISE STATED WELD EDGE PREPARATION OF BUTT WELD PIPE CONNECTIONS

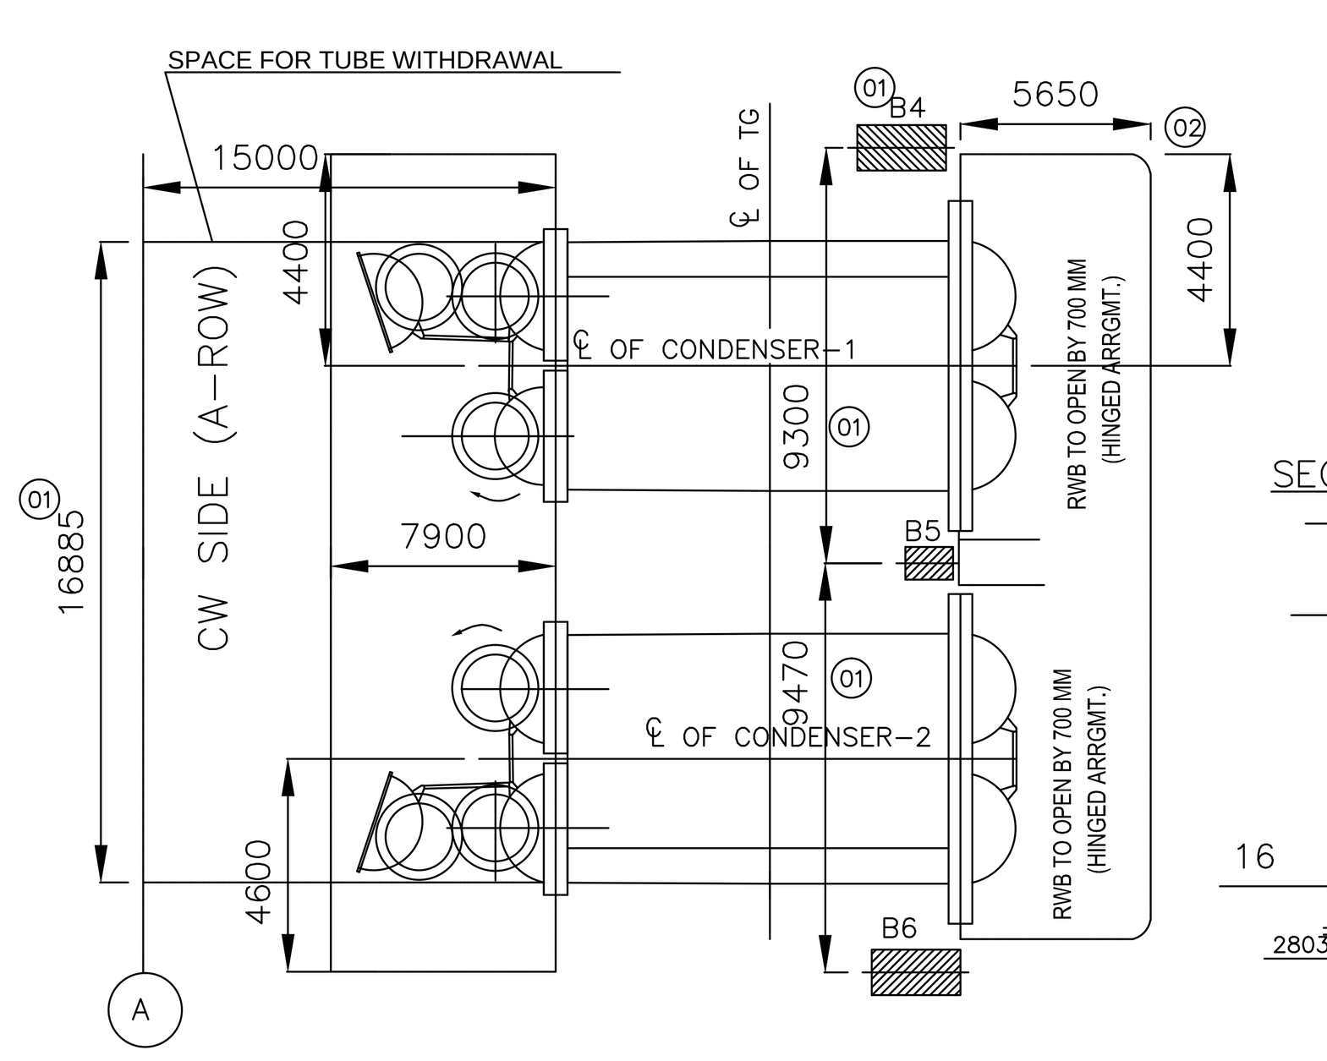


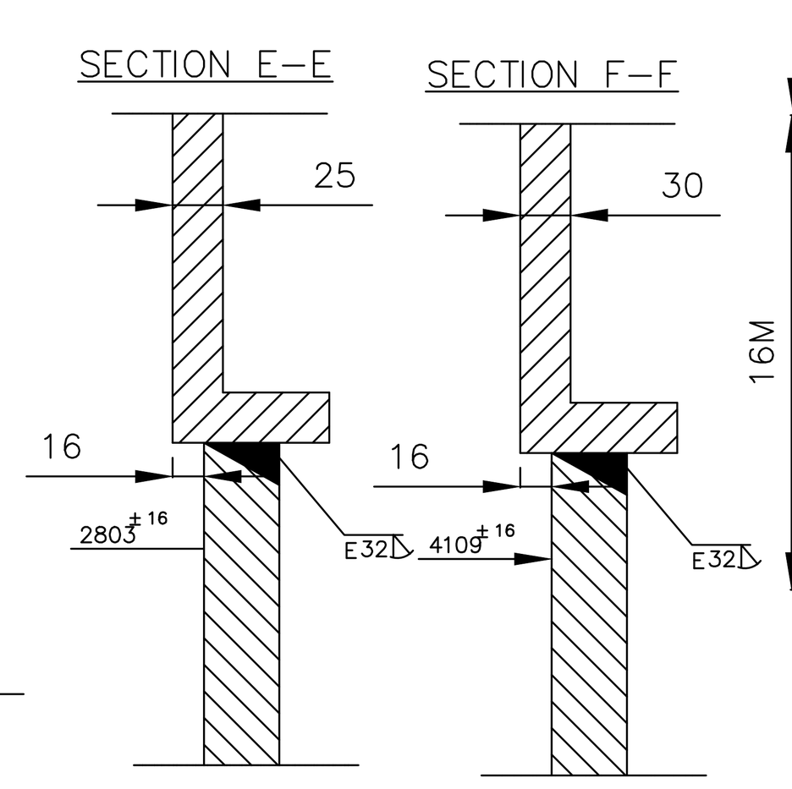
A-A (NTS)



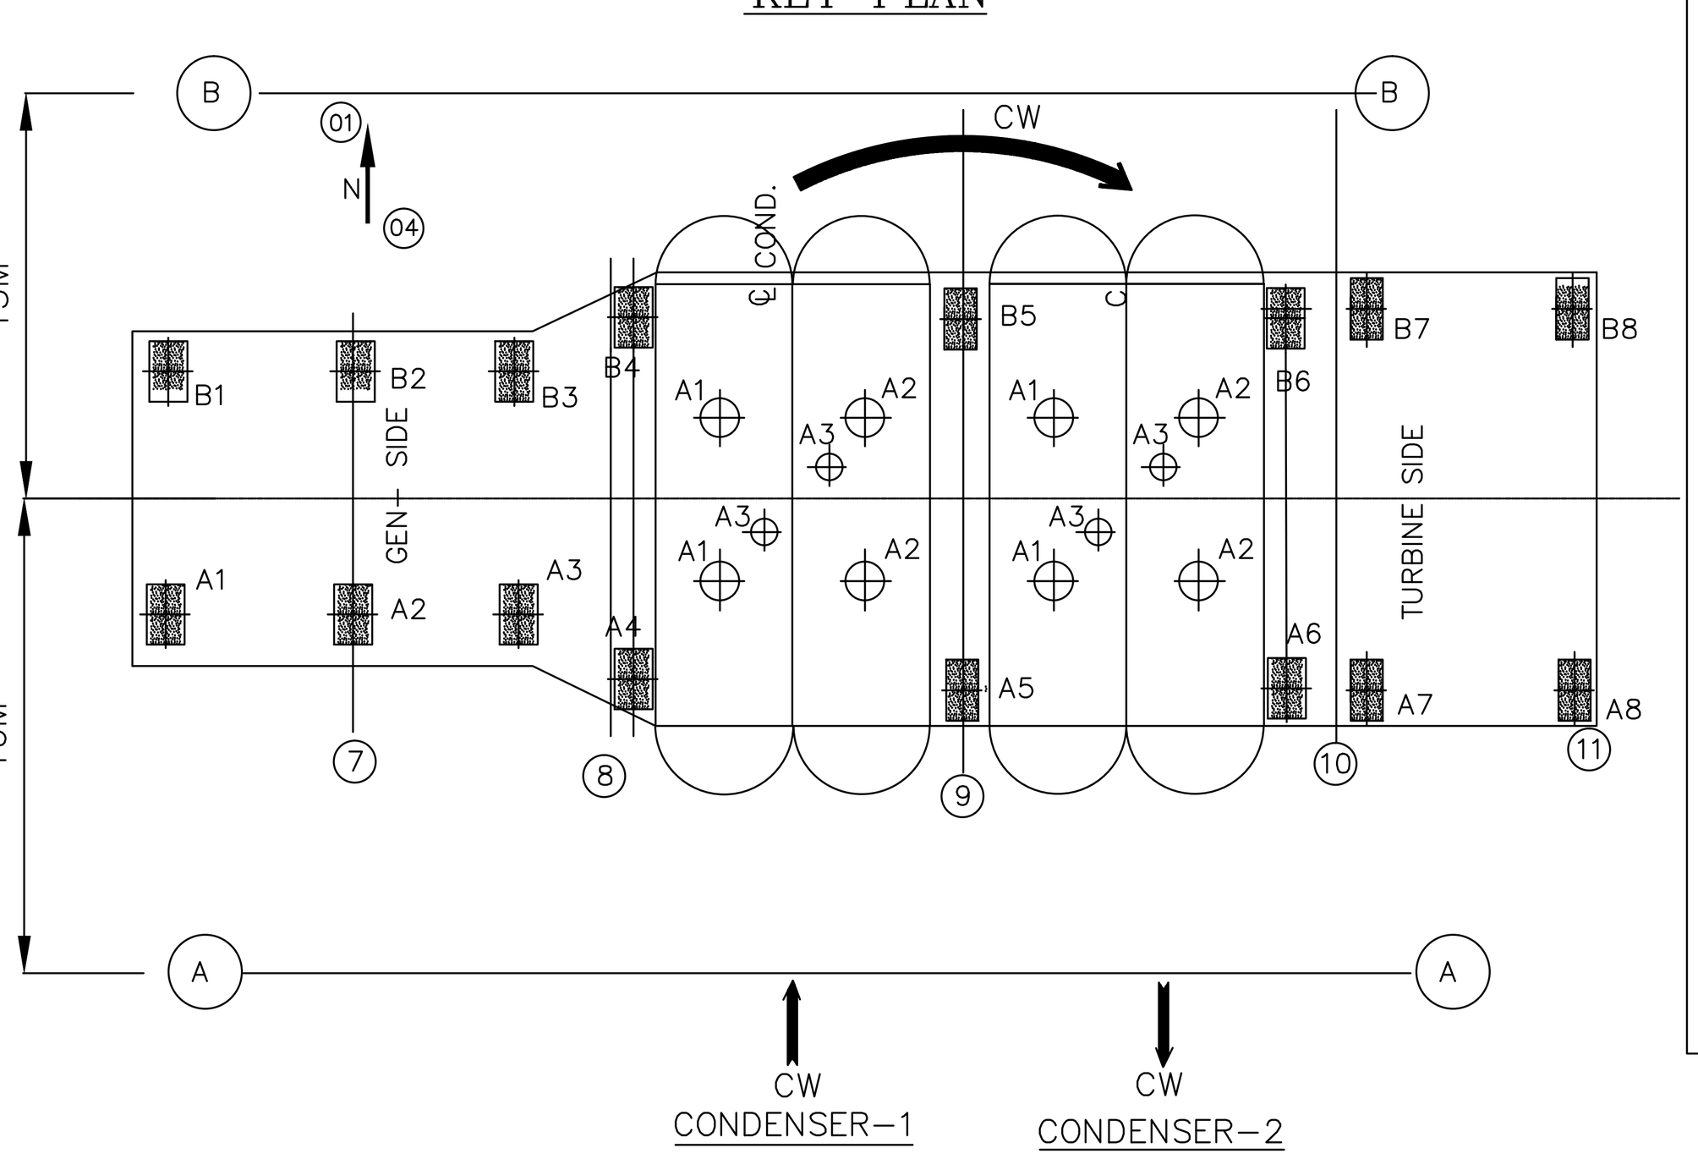


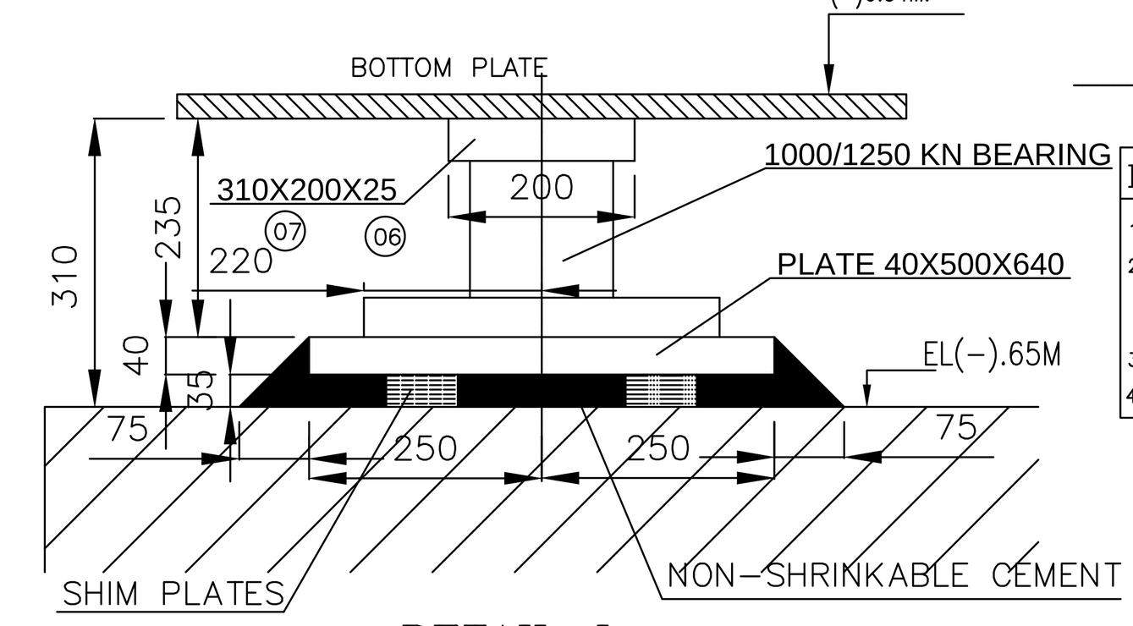
SPACE REQUIREMENT FOR WATER BOX REMOVAL AND TUBE WITHDRAWAL





KEY PLAN





DETAIL-I

DESIGN CONDITION	STEAM SIDE	WATER SIDE
1. DESIGN PRESSURE	FULL VACUUM & 1.08Kg/cm² (g)	0.1 Kg/cm² (abs)& 5.6 Kg/cm² (g)
2. TEST PRESSURE	FILLING WATER UP TO 300 MM ABOVE FINAL JOINT OF CONDENSER EXHAUST NECK TO TURBINE. (1.422Kg/cm² (abs))	7.28 Kg/cm²(g)
3. DURATION OF TEST	24 HOURS (MIN.)	30 MINUTES (MIN.)
4. DESIGN TEMPERATURE	120 °C	60°C

ONE CONDENSER WEIGHT:- (01)

DRY WEIGHT - 600 T (EXCL. LP HEATER WEIGHT)
OPERATING WEIGHT - 950 T
FLOODED WEIGHT - 1750 T
L.P. TURBINE OUTER CASING WEIGHT - 110 T

PAINTING:-

1. THE CONDENSER IS PAINTED AT WORKS AS FOLLWS:-
   STEAM SIDE SURFACES - STEAM WASHABLE PAINT
   CW SIDE SURFACES EPOXY BASE ZINC RICH PRIMER PAINT
   OUTSIDE SURFACES EPOXY BASE ZINC RICH PRIMER AND INTERMEDIATE PAINT
2. THE CONDENSER IS TO BE PAINTED AT SITE AS FOLLOWS:-
   EXTERNAL SURFACE:- TO BE PANTED WITH 2 COATS OF POLYURETHANE FINISH PAINTS. TOTAL DFT (FINAL) - 180 MICRONS
3. INTERIOR OF THE WATER BOXES AND WATER SIDE SURFACE OF TUBE PLATES TO BE PAINTED WITH EPOXY BASED ZINC RICH PRIMER AND HIGH BUILD BLACK COALTAR EPOXIDE PAINT. THE TOTAL MIN. DRY FILM THICKNESS AFTER PAINTING SHALL BE 200 MICRONS.
4. DECONSERVATION:-
   STEAM SIDE SURFACES OF THE CONDENSER SHOULD BE THROUGHLY CLEANED WITH THE APPLICATION OF STEAM. SINCE THEY HAVE BEEN SUPPLIED COATED WITH STEAM WASHABLE RUST PREVENTIVE PAINT.

DESIGN DATA:-

1. COOLING WATER FLOW = 84210 M^3/Hr
2. COOLING SURFACE AREA (DESIGN) = 2x34736 M^2
3. COOLING WATER INLET TEMPERATURE (DESIGN) = 33 °C
4. COOLING WATER TEMPERATURE RISE = 9.4 °C (4.72°C + 4.68° C)
5. NUMBER OF TUBE PASSES = 1
6. TUBE CLEANLINESS FACTOR = 0.9
8. COOLING WATER SIDE PRESSURE DROP = 2x2.86 MWC (EXCL. INTERCONNECTION PIPES)
   (PRESSURE DROP INDICATED ABOVE IS BETWEEN C.W. INLET OF CONDENSER-1 AND CW OUTLET OF CONDENSER-2.)
9. NO. OF COOLING TUBES (TOTAL) = 2x29755 NOS.
   9.1 CONDENSING ZONE = 2x27673 NOS.
   9.2 AIR COOLING ZONE = 2x2082 NOS.
10. SIZE OF COOLING TUBE = DIA 25.4 X 0.7112 mm,L=14730 MM(COMPLETE LENGTH)
    DIA 25.4 X 0.889, L=14730 MM(COMPLETE LENGTH) (FOR TOP TWO ROWS)
11. MATERIAL OF COOLING TUBES
    - CONDENSING ZONE
    - AIR COOLING ZONE AND TOP TWO ROWS
    = WELDED SS (ASTM A-249-TP304) (01)
12. CONDENSER HOTWELL STORAGE CAPACITY BETWEEN NORMAL WATER LEVEL AND LOW LOW WATER LEVEL. = 2x51.66 CUBM (3 MINUTES STORAGE CAPACITY)
12. CORROSION ALLOWANCE:
    a) WATER BOX, TUBE PLATE = 3.2 MM
    b) SHELL, HOTWELL, CONDENSER NECK = 1.6 MM
13. HEAT LOAD = 397.5 GCAL/HR (CONDENSER-1) & 392.5 GCAL/HR (CONDENSER-2).
14. DESIGN CONDITION = VWO 1% mu
    CONDENSER BACK PRESSURES = 0.0774 ata (CONDENSER-1) & 0.0992 ata (CONDENSER-2)

LIST OF MATERIALS:- (MAJOR PARTS)

SL.NO.	DESCRIPTION	MATERIAL
1	BOTTOM PLATE, SUPPORT PLATES, DOME WALLS, WATER BOX, SHELL, HOTWELL	IS:2062, Gr: B
2	MAIN TUBE PLATES	IS:2062, Gr: B
3	BAFFLES IN A.C. ZONE	SSTP 304
4	PIPES	IS:1239, Gr.: ERW
5	TIE ROD	IS:1570, Gr20 C8
6	DUMP PIPE	ALLOY STEEL P-11
7	BOLTS & NUTS	ALLOY STEEL CL. 8.8 (02)
8	GASKET	NEOPRENE
9	NOZZLES	CARBON STEEL

NOTE:

1. CONDENSER IS TO BE DESPATCHED IN LOOSE PARTS MAINLY COMPRISING, OF THE FOLLOWING.
   i) BOTTOM PLATE
   ii) TURBINE AND GENERATOR SIDE WALL PLATES.
   iii) DOME WALLS
   iv) FRONT WATER CHAMBERS AND REAR WATER CHAMBERS WITH TUBE PLATES
   v) TUBE SUPPORT PLATES 2X18 NOS. PER CONDENSER.
   vi) FIXED SUPPORTS (MULTI BALL BEARINGS).
   vii) WATER BOX HINGE ARRANGEMENT FOR FRONT & REAR WATER BOXES.
2. FOR INSTRUMENTION & FITTING FOR CONDENSER LEVEL CONTROL REF. DRG. NO. 11600070008C209
3. BOTH CONDENSERS TUBES ARE TILTED BY 0.5° TOWARDS A-ROW SIDE FOR SELF DRAINING.
4. CONDENSATE LEVEL IN EACH CONDENSER IS DIFFERENT.
5. EL 0.00M CORRESPONDS TO RL 99.5M I.E. FFL OF TG HALL.
6. CONDENSER IS DESIGNED, MANUFACTURED AND TESTED AS PER HEI,USA.
7. THE EMBEDMENTS PROVIDED ARE FOR ANCHORING & GUIDING CONDENSER MOVEMENTS.
8. MITRE IS THE PART OF WATER BOX AND WILL SUPPLY BY BHEL-PEM.
9. LARGE BOX TYPE SCREENING STRUCTURE WITH ANTI-VORTEX BAFFLING IS PROVIDED AT EACH HOTWELL CONNECTION TO SUCTION OF CONDENSATE PUMPS.
