

• Technical Specifications:

- Silver Plating on Al. splice plates/Flat/Flexible/Conductor/Blanking Plate and Palm including handling, polishing, buffing on items of various projects. The silver plating should be 13-15 microns. Silver plating shall be done as per drg. No.45410001025 and as per product standard-SG15600 REV.03 & QAP No. QAP/BD/164 Rev-02.

Composition of Components to AA 12329: (Amendment in Annexure-1)

The Chemicals composition of material when analysed in accordance with IS:504(Methods for chemical analysis of aluminium and its alloys shall be follows:

<u>Elements</u>	<u>Percent</u>	
	<u>Min.</u>	<u>Max.</u>
Magnesium	0.4	0.9
Silicon	0.3	0.7
Manganese	-	0.03
Copper	-	0.05
Iron	-	0.50

Aluminium remainder
