

SPECIFICATIONS OF DC POWER SUPPLY

- Output Current range : 0 to 900 A DC
- Output Voltage range : 10 V DC
- Voltage regulation : 0.1% of maximum output voltage
- Current regulation : 0.1% of maximum output current
- Voltage ripple : 40 mV rms
- Drift stability : +/- 0.05% of set point value
- Input supply : 415 volts +/-5%, 3 phase, 50 Hz +/-2%

Note : The DC Power supply should be suitable for superconducting magnet.
